DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, 16-17 and 22, drawn to SEQ ID No. 1 (polypeptide) and compositions containing SEQ ID No. 1, classified in class 530, subclass 350.
- II. Claims 3-9, 11-12 and 23, drawn to polynucleotides and compositions containing them, classified in class 536, subclass 23.1+.
- III. Claim 10, drawn to antibody, classified in class 530, subclass 387.1+.
- IV. Claims 13-15, drawn to methods for detecting a target polynucleotide using a polynucleotide, classified in class 435, subclass 6.
- V. Claims 18-19, drawn to screening for an agonist/antagonist, classified in class 435, subclass 7.1+.
- VI. Claim 20, drawn to method for screening for effectiveness in altering expression of target polynucleotide, classified in class 435, subclass 6.
- VII. Claim 21, drawn to a method for assessing the toxicity of a test compound using nucleic acid probes, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the different inventions are drawn to chemically distinct structures and can be used in different methods. For example the polynucleotide of group II can be used in hybridization assays whereas the products of groups I and III cannot.

The methods of groups IV-VII are not related because they have different end results and different steps and involve the use of different reagents.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
